

Analytics Visualisation User Manual

Pre-requisites

- Good internet connection
- Web browser (e.g. Firefox/Chrome/Edge/Safari etc.)
- Access to the PEACH analytics website
 - At the time of writing (21 March 2018), the link is:
 - <http://students.cs.ucl.ac.uk/2017/group4/project.html>

Instructions

1. Visit the PEACH analytics webpage
 2. Click on the Kibana button
 3. Enter in your credentials (the default is elastic:peachanalytics or elastic:changeme)
 4. Refer to <https://www.elastic.co/guide/en/kibana/current/getting-started.html> for information on how to use Kibana
- Things to note
 - Uploads are carried out through the Peach analytics website or through the anonymisation application
 - All uploads have a document type of “uploaded-file”
 - All uploads are uploaded to indexes with the pattern “peach-analytics-{}” where {} is an integer number, this integer number is incremented by 1 after each upload
